Dear Sir:

In response to the restriction requirement mailed August 16, 2006 for the above referenced patent application, Applicants elect, without traverse, Specie I, claim 74, drawn to energizing the receiver for a first energized period, then deenergizing for a short period if no preamble signal is detected, then energizing for a second energized period, and then

deenergizing, at least if no preamble signal is detected, for period longer than the short period,
prior to reenergizing the receiver.

In addition, Applicants also respectfully request that the application be amended
as follows:
